Martin Marietta Materials, Inc.
Reconciliation of Net Earnings to Adjusted EBITDA
(dollars in millions)

Earnings from continuing operations before interest; income taxes; depreciation, depletion and amortization expense; earnings/loss from nonconsolidated equity affiliates; acquisition, divestiture and integration expenses; the impact of selling acquired inventory after its markup to fair value as part of acquisition accounting (the Inventory Markup); nonrecurring gain on divestiture; and noncash asset and portfolio rationalization charge, or Adjusted EBITDA, is an indicator used by the Company and investors to evaluate the Company's operating performance from period to period. Effective January 1, 2024, the Company has elected to add back, for purposes of its Adjusted EBITDA calculation, acquisition, divestiture and integration expenses and the Inventory Markup only for transactions with consideration of $2.0 billion or more and expected acquisition, divestiture and integration expenses of at least $15 million.

Adjusted EBITDA is not defined by U.S. generally accepted accounting principles and, as such, should not be construed as an alternative to net earnings attributable to Martin Marietta, earnings from operations or operating cash flow. Because Adjusted EBITDA excludes some, but not all, items that affect net earnings and may vary among companies, Adjusted EBITDA as presented by Martin Marietta may not be comparable with similarly titled measures of other companies. Consolidated Adjusted EBITDA is calculated as follows:
